EDUCATION

B.Sc. Applied Computing
PTUK, Ramallah
2020 – 2024

LANGUAGES

Arabic — Native
English — Professional

CERTIFICATIONS

YOLOv7 Object Detection — Udemy (2025)
AI with Python & TensorFlow — Udacity (2024)
ASP.NET Core & Angular — Experts (2024)
Modern Python Bootcamp — Udemy (2023)

Profile

Mid-Level Full-Stack Developer and AI Engineer with **3+ years** of experience designing and delivering scalable enterprise applications. Proven expertise in React, Angular, .NET Core, and Python-based AI systems including RAG platforms, intelligent search, and real-time object detection. Demonstrated ability to lead cross-functional development teams, architect complex distributed systems, and ship mission-critical software for tourism, financial, and enterprise clients across the MENA region. Passionate about leveraging cutting-edge AI to solve real-world business challenges.

Experience

Full-Stack Data Engineer Sep 2025 – Present

MENAATAL (Top MENA Talents) · Remote · Client: Youmna Global

- Architected **NexusRAG**, an enterprise-grade RAG platform delivering context-aware AI responses with high accuracy and low latency
- Engineered robust data ingestion pipelines for Notion workspaces and document repositories using embeddings and vector databases (Qdrant)
- Built retrieval, indexing, and semantic search modules with intelligent reasoning fallback for complex queries
- Developed a full-featured **Applicant Tracking System** with job postings, automated screening, and stage-based candidate pipelines

AI Engineer 2024 – Present

IBSAR · Co-founder, part-time

- Co-founded a microservices-based AI product (~5 connected services) deployed on Hetzner
- Fine-tuned YOLO models** for computer vision use cases (object detection, custom datasets)
- Designed and integrated AI features across the product line

Full-Stack Developer Jun 2024 – Nov 2025

Al-Ghassan Systems · Ramallah (full-time through Aug 2025, then part-time)

- Led end-to-end development of a tourism management system using Angular and .NET Core, serving thousands of users
- Maintained and enhanced multiple enterprise systems including ERP modules and workforce management solutions
- Designed and implemented REST APIs with payment gateway integration for diverse client projects
- Built a self-service kiosk payment system from scratch, owning the full development lifecycle

Full-Stack Developer (Intern) Jun – Sep 2023

iConnect Technologies · Ramallah

- Built responsive web applications using Angular and ASP.NET Core in a collaborative Agile team
- Participated in code reviews, sprint planning, and daily standups while delivering features on schedule
- Hands-on experience with enterprise development workflows including Git and CI/CD pipelines
